I am going to show you a number of games that the magician or gambler plays against a spectator one on one. The spectator gets a free choice of the objects that are used in the gambling game. ( Some games use cards, dice, pieces of paper, spinners, etc.) For example, say the spectator has a choice of four dice. Spectator picks one die and the magician picks one die. Each rolls their die, and the high number wins. Whoever wins a best of 12 game match wins the game. Unfortunately for the spectator, the magician will almost always win the match. The probability will ALWAYS be in the magician s favor. There is no sleight of hand or funny business. These type of games are called non transitive games.
